

IDEAS

FILTER

- For service types, remove the overlapping ones (i.e. "Total...")
- Exclude the data that shows "Australia" & "Unknown"

* KEEP:

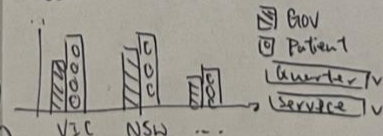

- Map (population + bulk-billing label)
- Grouped bars (Gov vs Patient)
- 100% stack bar (for service types)
- Per capita toggle
- KPI
- Quarter dropdown
- Service type legend
- State selector

CATEGORISE

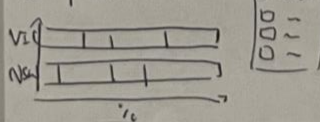

Geography: on a map

- fill = population
- label = Bulk-billing %

Money Comparison: Gov vs Patient

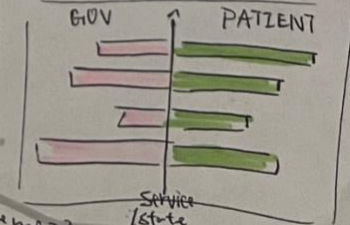

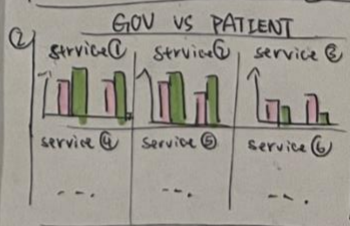

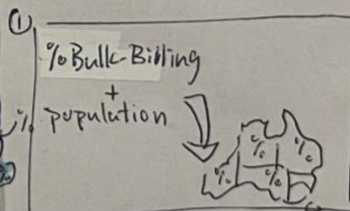

Composition

QUESTION

- Is the bulk-billing rate easy to read on the map?
- Can users focus on a service type & Quarter?
- Which parts are showing per-capita data?

COMBINE & REFINE

A detailed view of the bulk-billing rate in \$, so audience can know which state spending the most.

Name: Pik Ying (Grabby) Wong

Student ID: 32663706

Date: 2/10/2025

Sheet: 2

Title: Who Covers What in Australian Healthcare

OPERATION

- 1) Change "Quarter" → KPI, map data (population & %) & grouped bars that compare the gov & patient spending.
- 2) select services to see the comparison.
- 3) Hover the state on the map → Tooltip: State, population, bulk-billing rate.

DISCUSSION

Pros:

- Bulk-Billing rate is on the map so it's easy to read.
- Per-capita option keep the comparison fair across state size

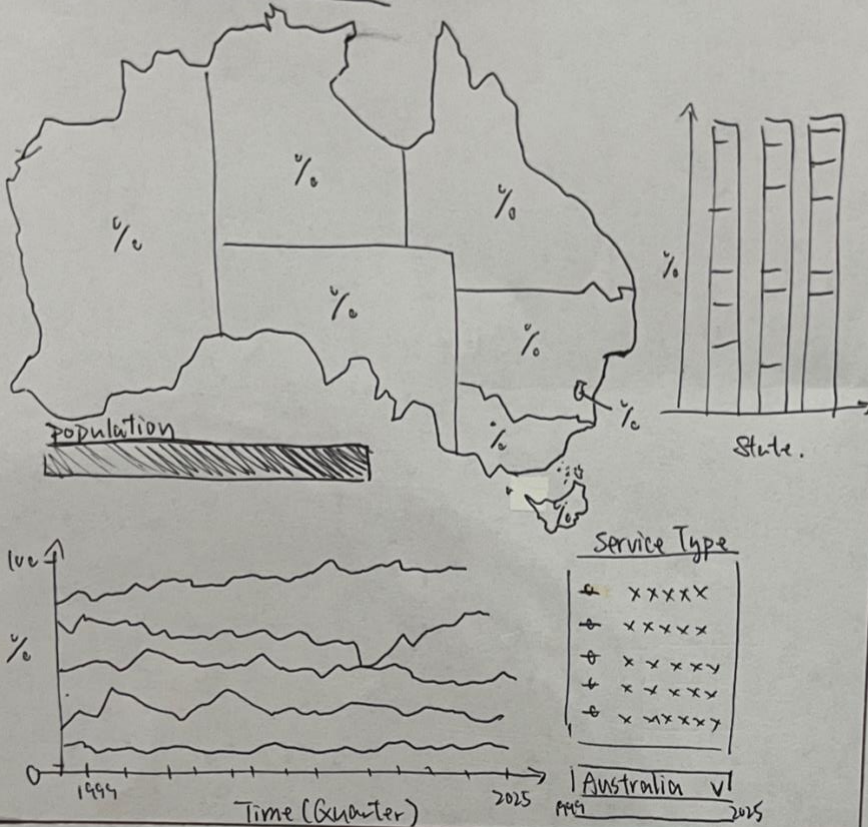

Cons:

- Doesn't have a main section that audience will focus on. → map
- the map & group bar chart both focus on by state data which is overlapping.
- Doesn't show change in time.

Sheet : 3

Title : Who Covers What in Australian Healthcare

OPERATION

- ① Quarter selector → map & stack bars
- ② Quarter selector that can choose the start & end period for the line chart.
- ③ Metric toggle → stack bar, that users can choose to see either the number of attendance or the money spent in each service type & state.
- ④ Hover the line to see the exact numbers & other information
- ⑤ Hover the stack bars to see both the # of attendance & \$.

FOCUS

DISCUSSION

Pros:

- the 100% stack bar chart allow users to see both the volume share & spend share. In both % and exact number
- 3 different aspects — states, time period, service types.

Cons:

- filters might be confusing for the users
